Custom Vinyl Banners Finish Option

Before placing your order, it's a good idea to vie Free Hems and Grommets. HEMS

FREE HEMS & GROMMETS Every Banner comes with free welded hems and grommets

Grommets are small metal rings that are typically inserted into the corners or along the edges of a custom vinyl banner, which provide a secure way to hang the banner. Grommets are typically made of brass, aluminum, or other durable materials and are placed at regular intervals along the banner. The grommet itself a a small hole, usually reinforced with a metal ring, which allows for the banner to be hung up with a rope or structure. The grommet itself a small hole, usually reinforced with a metal ring, which allows for the banner to be hung up with a rope or exposed to hardwith weather conditions, as they are durable and resistant to tearing.

Hens on a custom vinyl banner refer to the finished edges of the banner that have been folded over and sewn to create a reinforced edge. This adds stability and strength to the banner and also provides a clean, finished look. The most common types of hems are double-fold hems and pole pockets. Double-fold hems are created by folding the edge of the banner over twice and sewing it in place to create a clean, finished edge Pole pockets, on the other hand, are created by sewing a pocket along the edge of the banner that is used to insert a pole or other support structure. **Comments** 

Pole pockets are a feature on custom vinyl banners that are designed to make it easy to hang the banner using a pole. They are essentially a folded-over and sewn edge of the banner, which creates a pocket where a pole can be inserted. This allows the banner to be hung from a pole or a rope, and it provides a secure way to display the banner. Pole pockets are typically placed at the top and bottom of a banner and can be created in different sizes to fit different diameter poles. Pole pockets are a convenient way to hang a banner, as it eliminates the need for additional hardware or rigging to display the banner. additional hard

0

Wind slits, also known as wind flaps, are small cuts or openings in a vinyl banner that are designed to reduce wind resistance and prevent the hanner from tearing or getting damaged in windy conditions. When the wind blows against a hanner, it can create a large amount of force on exerted on the banner and making it more resistant to damage. They are usually placed at the corners or along the edges of a banner and common feature on banners that will be hung in high-wind areas or exposed to harsh weather conditions.
